Purpose:

Description

“NIBE Heating” - the market leader of wood-burning stoves in Sweden. The products of this company are famous for their quality and efficient combustion technology.

A stove with a soapstone top that accumulates and releases gentle heat into the environment after the wood has finished burning.

Specificities:

- clean glass system - thanks to more efficient fuel burning technology, the fireplace core is particularly economical, soot formation - minimal;
- stove meets the particularly high environmental requirements and low emission standards, regardless of the heating capacity;
- firewood logs used for heating - up to 33 cm length;
- heating capacity up to 120 m²
- doors are made from cast iron;
- the combustion chamber is covered with vermiculite bricks;
- Combustion air is supplied from outside or from a nearby room. This way, the air in the stove always stays fresh;
- moving grates and the ash box;
- the stove is connected from top or from the back;
- adjustable power: 3-7kW, nominal power 5kW.

The stove body has a 5-year warranty.
