Stove CONTURA C610:1 G Style, stove body white color, set (798403, 398273, 398284)

Product code: Z4NIB-301453
Brand: Array
Category: Wood burning stoves > Steel stoves

PRICE : €4,400.00

About the product

Manufacturer:
Country of origin:
Height, mm: 1260
Width, mm: 540
Depth, mm: 495
Power (kW) to: 6
Efficiency class:
Efficiency: 86
Made of:
Color:
Decoration:
Fuel type:
Chimney diameter, mm:
Shape of glass:
Heating (cooling) area (m2) to: 150
Warranty, year: 5
Purpose:

Description

"NIBE Heating" - the market leader of wood-burning stoves in Sweden. The products of this company are famous for their quality and efficient combustion technology.
The top of the stove is cast iron, the body is painted white. Above the combustion chamber, on the outside of the oven, there is a shelf for maintaining the temperature of food or drinks.

Specifities:

• clean glass system - soot does not stick to the glass;
• the heated air used for combustion ensures that the fire can be seen through the door;
• stove meets the particularly high environmental requirements and low emission standards, regardless of the heating capacity;
• a space under the combustion chamber - you can store tools or firewood there;
• hidden and non-hot handle;
• automatic ignition system - the door can be closed when the firewood is just starting to ignite and it does not harm the combustion, as the air supply to ensure combustion is led through the grate and it is independent of the air in the room;
• the embers can be ignited by moving the valve on the left side of the stove. Oxygen is led into the combustion chamber and it promotes the burning of coal;
• quieter and more evenly moving ash box;
• firewood used for heating - up to 36 cm;
• the chimney connecting pipe can be taken out from above or back;
• the fireplace is covered with light fireclay tiles;
•there is a grate that prevents firewood from falling out of the combustion chamber;
• power can be set within 3-9kW.

The stove body has a 5-year warranty.
