

Mud separators magnetic threaded G 3/4"

Product code: T2MUT-7.030.02131

Category: Boiler room equipment and controllers > Boiler room equipment

PRICE : €93.19

About the product

Manufacturer: Mut meccanica

Height, mm: 222

Width, mm: 153

Depth, mm: 96

Mounting diameter: 19.05

Item type: Filtras

Warranty, year: 24

Description

Hydraulic systems where water fluid is properly free of contamination are more efficient, produce less noise and have a longer service life. MUT DF COMPACT composite dirt separator with magnet are used to remove continuously impurities in the hydraulic circuits. They allow to separate impurities, collecting them in the lower part (collection sump). Inside the "dirt separator", in a position transverse to the direction of flow, there is a new, special filter with "Cyclone effect": the particles of impurities bumping the grid undergo a further reduction of speed, and then settle more easily. The periodic twisting-off of the purge valve allows to empty the collection sump.
