

5l impregnation agent intended for impregnation of insulation boards inside the chamber, resistant up to 900 °C.

Product code: A3SIL-SILCADUR-HTI

Category: Fireplaces and stoves > Fireplace installation materials

PRICE : €46.90

About the product

Manufacturer: Silca

Height, mm: 200

Width, mm: 200

Depth, mm: 160

Item type: Impregnantas

Warranty, year: 24

Description

An impregnating material resistant up to 900°C, used in conjunction with SILCA calcium silicate products to strengthen the surface and 'bind' the dust. The impregnation material is inorganic, has a neutral smell and is suitable for additional preparation of SILCA 250 KM additional plate inside the fireplace. The product cannot be used as a primer for plastering or gluing. SILCACON primer should be used for these works. SILCADUR-HTI impregnation agent is easy to use, it can be sprayed or applied with a brush. SILCADUR HTI impregnation agent is intended for impregnation of tiles inside the fireplace.
